

Robust performance at competitive pricing

HVAC Control Pro

HVAC Control Pro is a robust, standalone HVAC control system. A standardized and programmed solution that provides professional performance at competitive pricing.

A perfect fit for you?

HVAC Control Pro is very suitable for yachts with standardized HVAC technology. The standardized products in this system offer state-of-the-art HMI-PLC at competitive pricing. The control system has a straightforward functional design. The functional design is especially apparent in the visualization. The visualization design follows the dashboard idea: "less is more". The control system measures and presents the data, but the operator needs to analyze it and decide which actions to take. It is an excellent solution optimized for less complex yachts.

75m/250ft

Best performance for yachts up to about 75 m.

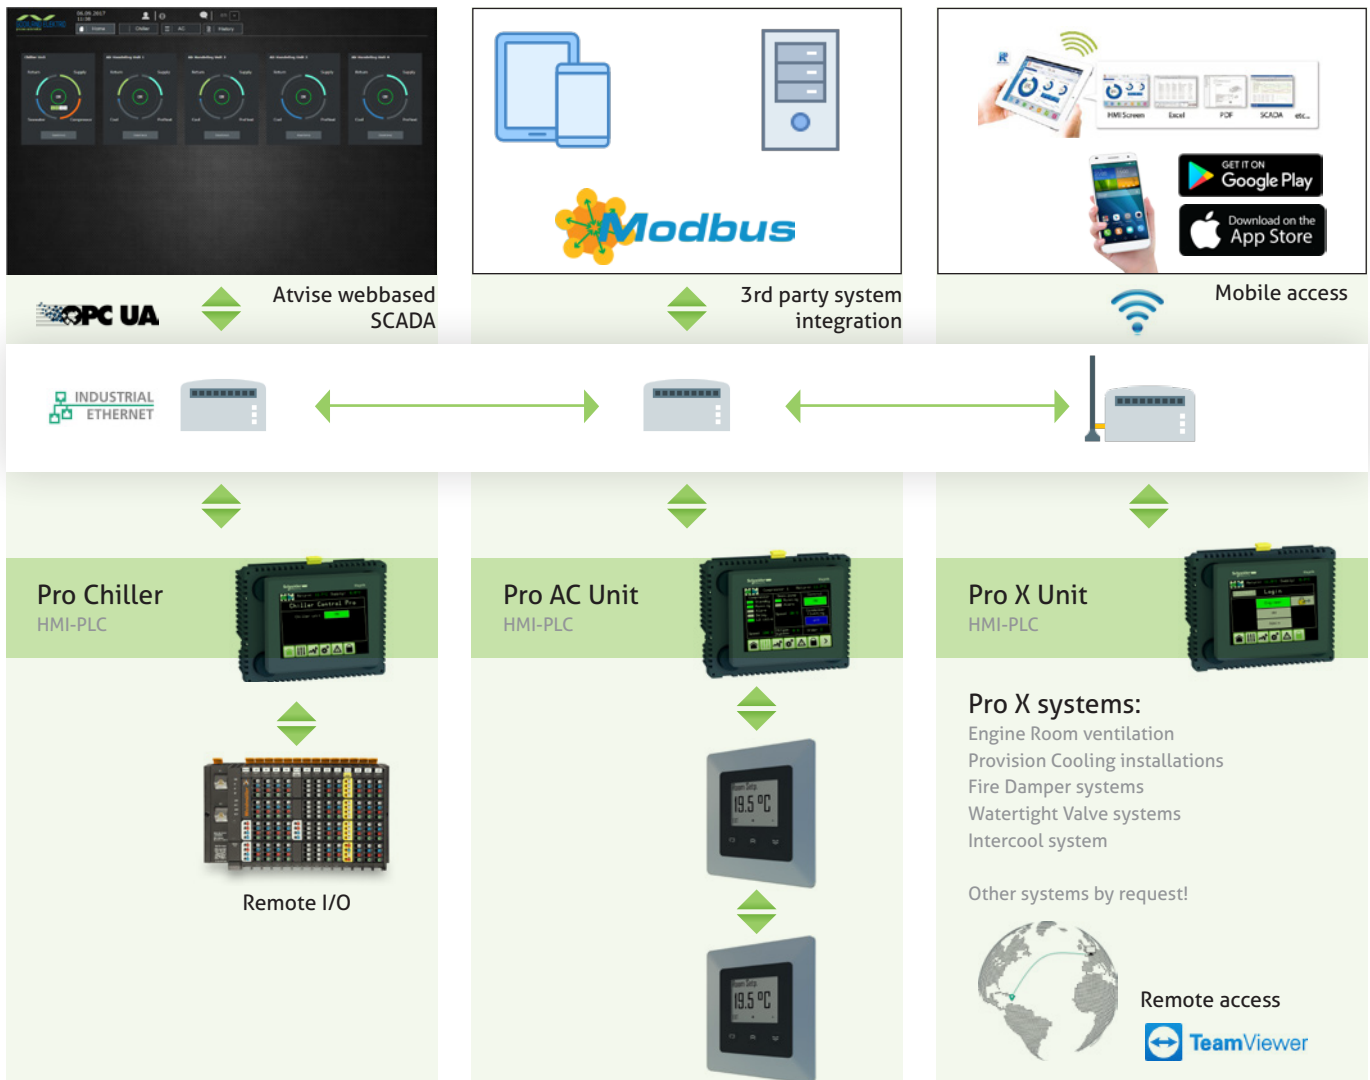

Highlights

- > Stand-alone operating Schneider PLC-HMIs
- > Atvise web-based SCADA
- > Standardized, fully programmed software
- > Completely built, wired and tested before delivery
- > Secure remote access
- > Standardized documentation
- > 3rd party system integration by Modbus

Benefits

- > High-quality product
- > Robust and durable
- > Competitive pricing
- > Straightforward functional design (less is more)
- > Quick problem solving through remote access, anywhere in the world

Gooiland Elektro, a Heinen & Hopman company

With over 30 years of experience in marine automation, Gooiland Elektro has developed a strong expertise in client-specific HVAC control solutions for all kinds of vessels. Taking into account maritime-specific conditions, such as ambient conditions, ship construction and applicable regulations and classifications, Gooiland Elektro realizes the most advanced technology. The Pro, Px Performance and HPx High Performance product range has been developed in order to meet the needs of different types of clients, ranging from series built vessels to 100% custom-built superyachts. Whereas the Pro solution provides high performance at competitive pricing, the High Performance solution offers unlimited possibilities; you name it, we build it.
